Notes on the list

The Hansa Brandenburg CC appears twice, under Germany and under Austria-Hungary.

The Hansa Brandenburg W.20 is the shortest-legged aircraft in the game at two legs, which is below the minimum time on station for every mission except a strike or a rescue search. It was designed to be carried onboard a submarine(!) inside a watertight container (German engineering, am I right?) and used as a scout craft for its mother ship.

Alas, in reality it never operated as such, as a lack of practicality and the end of the war got in the way. However, its legacy remained an interesting idea that was refined (kinda) by the Japanese during WWII.

To save weight, the W20 was, rather sadly, unarmed, which in 1918 was nothing to be proud of.
